## SUSTAINABLE DESIGN CPD AND SIX ECO-FRIENDLY TILE COLLECTIONS LAUNCHING AT GRETEC STUDIO 329, ISLINGTON

Visit Grestec’s Islington Studio during the London Design Festival 19th-23rd, to discover the launch of six new sustainable tile ranges, containing 40-62% recycled material. Each range draws inspiration from the latest design trends, from warm terracotta tones to sculptural forms and colourful handcrafted styles.

Throughout the London Design Festival, Grestec will welcome architects, designers, and specifiers to its Islington studio, as well opening for a late-night evening on Thursday 22nd September.

Learn all about ‘Safe and Sustainable Design with Tile Finishes’ by signing up to the CPD seminar at 3 or 6pm on Thursday 22nd September. The interactive presentations focus on best practises, sustainable design requirements and eco-friendly tile finishing options.

Designers will discover Grestec’s sustainable tile choices, imparting a wealth of inspiration and knowledge for designing with tiles for their next project.

Complimentary nibbles and drinks will be served, please complete the free registration if you wish to attend the CPD only, registration is not required for studio visits during the event.

### ABOUT GRETEC:

Grestec supply high-quality floor and wall tiles to the UK’s architectural and design community, offering an extensive range of porcelain, ceramic, glass & natural stone tile products. Visit Grestec.co.uk to see the full range.

### GROND ONE - PORCELAIN TILES

The earthy warm tones of clay and terracotta are growing in popularity; ranging from the lightest shades of peach and clay, through to burnt orange and deep brick, all shades of terracotta are becoming popular in both interior and exterior spaces. Recreate the saturated terracotta landscapes from holiday getaways or Moroccan architecture, with warmly toned porcelain tiling in our Grond One collection.

Grond One is available in three finishes natural (R10), brushed (R10) and structured (R11/C) and nine sizes, including a 1200x2800 large format and an external 20mm thick option, making it suitable for both internal and external areas for seamless application.

Grond One is EPD verified and contains 40% recycled content.

### AVINA - CERAMIC TILES

The embossed surface make Avina a core material for creating a subtle, tactile interior style with the use of just a single colour. Avina presents tactile, ceramic wall tiles in 50x200mm in six base colours; White, Grey, Black, Blue, Green and Terracotta in three soft, geometrical, 3D surface textures. Play with light and shadow created by the three-dimensional patterns to bring any interior space to life.

Sculptural tiles can be applied to accentuate architectural spaces. Choose vibrant shades to create a statement and an eye-catching feature wall, or select a more neutral colour palette for a more subtle and sophisticated feel. The 3D formats offer light reflecting textures that add depth and movements to walls.

Avina is EPD verified and contains 62% recycled material.

### CHATEAU ONE / TWO / THREE - PORCELAIN TILES

Chateau is inspired by the natural elegance of cut stone, available in four stone effect colours in three styles, Chateau One, Two and Three.

Chateau One offers an elegant, authentic realisation of a fossil rich natural stone with a faithful, natural variance within each tile. Chateau Two presents a subtle and refined interpretation of consistent natural stone slabs, available in both a 10mm thick and an external 20mm thick option. Lastly, Chateau Three presents the stone effect collection with an uneven, tumbled edge, for a lived-in look. Naturally weathered style tiles provide users with a closer connection to nature and can be used to create a relaxed interior style.

The Chateau ranges offer a complete collection suitable for walls and floors, both internally and externally for seamless designs. Chateau is EPD verified and contain 40% recycled.

### MACARI - CERAMIC TILES

Macari offers fourteen bright and decisive colours in a 65x130 brick format, inspired by artisan ceramic tradition. Macari is available in a gloss finish and is suitable for internal wall applications.

A handcrafted style signals a broad shift away from clean, minimal surfaces, to embrace the 'imperfect perfect' interior trend. The unique, tactile qualities of each tile in our Macari collection delivers elegance and personality to interior spaces.

Macari is EPD verified and contains 62% recycled content.
