

UNVEILING NEW DESIGNS AT THE LONDON DESIGN FESTIVAL

CTO Lighting Showroom – 20 to 24 September 2021
9 Cloudesley Road, London, N1 0FH

British luxury brand CTO Lighting is opening its showroom to the public for the occasion of the London Design Festival 2021 this September.

This year CTO Lighting will participate in the London Design Festival showcasing four brand new collections, AVALON, ANVERS, PENDULUM - designed in collaboration with Dan Yeffet and the latest MODULO collection, designed in collaboration with Italian designer Federico Peri, and launched in early September in Milan, as well as classic and decorative lighting designs that built the company reputation within the lighting luxury design industry.

CTO Lighting is an exclusive, luxury lighting company, which celebrates contemporary design, premium materials and British craftsmanship.

The company has founded its reputation on a combination of high quality craftsmanship and curated design of contemporary decorative lights.

Never faltering in its pursuit of design excellence, CTO Lighting is frequently used by architects and interior designers in a vast range of projects from 5 Star hotels to private residential interiors, always adding a layer of depth and originality where they are installed. All CTO Lighting is made at its factory in the UK.

The signature materials of satin brass, bronze, alabaster, mouthblown and handmade glass are combined with design influences from both nature and architecture.

The handmade nature of the products results in truly unique lights, which produce a warm, ambient glow, setting a mood of sophistication and elegance.

AVALON – Chandelier

Ornamental Minimalism at its best; AVALON is inspired by the legendary island, from where mystical stories of light and shadows have enchanted the world for centuries.

The AVALON collection evokes the legend with its enchanting and mesmerising lights. The majestic qualities of the AVALON chandeliers reflect the mythical island showcasing cascades of light emanating from a precious ring of alabaster, encapsulated in brass or bronze creating an exquisite illumination.

The AVALON collection of striking chandeliers features a continuous ring of alabaster columns, which seemingly float, creating the mystical illusion of its namesake. Each column is illuminated, highlighting the unique striations of every piece of alabaster. The brass ring frames the natural stone, creating a powerful contrast, showcasing the translucent quality of the alabaster.

The AVALON chandeliers can be used solo, creating an elegant centerpiece, or arranged in multiples of varying sizes, producing a decorative statement.

The various formats and sizes within the collection allow for scalability, for use in residential and commercial settings.

ANVERS – Pendant, wall, and ceiling lights

In pursuit of minimal luxury, the new ANVERS collection, from CTO Lighting, is inspired by Antwerp, a city and region of refined Flemish beauty and elegance. Renowned for its classical architecture and understated luxury, Antwerp is a cultural gem, reflected in the ANVERS collection of lighting, which bears its name.

Inspired by the linear plains of the Flemish landscape, the ANVERS collection embodies the low-lying profile of the terrain with its refined silhouette, whilst creating maximum impact through its exquisite disc of natural alabaster stone.

The translucent disc of honed alabaster is encased within solid brass, creating a pure and elegant piece. The natural striations within the alabaster, produce an individual and distinctive feature.

The ANVERS collection is versatile, featuring various size options in both pendants and mounted ceiling or wall lights. Each light can stand alone, creating a dramatic illumination, or can be assembled in multiples, creating a truly unique and striking lighting installation.

The various formats within the collection allow for a balance of proportion in a room; the ceiling mounted lights produce a dramatic feature without the necessity of height.

PENDULUM – Pendant, Floor, and wall lights

DESIGNED BY DAN YEFFET FOR CTO Lighting

PENDULUM collection is a design collaboration with Dan Yeffet, the AD100 accredited Parisian design studio.

Combining the flair of European design with the expertise of British craftsmanship, PENDULUM presents a striking collection of contemporary lights.

Balance and refinement are the key elements of the PENDULUM collection, inspired by the timepiece, with its mesmerising and hypnotic qualities.

The PENDULUM collection emanates light, which appears to oscillate in concentric bands from the light source, encased and diffused by the mouth-blown, curved glass.

The brass core of the light is hand polished by artisans to achieve a satin finish, which perfectly punctuates the light, completing the exquisite design.

The pendant and floor lights are supported by elegant, sculptured metalwork, creating a mid-air suspension, with the floor version grounded by a solid nero marquina marble base.

MODULO – Chandelier, pendant, and wall lights

DESIGNED BY FEDERICO PERI FOR CTO Lighting

The new MODULO collection of chandelier, pendant and wall lights is the result of a collaboration between the celebrated Italian designer Federico Peri and CTO Lighting.

MODULO is distinguished by its modular form, arranged in linear configurations, creating versatile, suspended lighting sculptures. Federico Peri explores the concept of connectivity through luxurious materials of ornate glass and opal domes, contrasted with architectural brass metalwork, creating a mesmerising collection.

Combining functionality with artisanal skill, the design focuses on geometric forms, connected in compositions of modules. The glowing domes are spaced in a linear pattern, allowing the light to reflect along the transparent, elongated glass disc and metal frame.

Each smoked kiln cast glass plinth is unique, hand-crafted by artisans, textured and subtly tinted, true to the qualities of CTO Lighting. The jewel like glass module is suspended by hand-finished brass, providing a delicate and decorative framework. The configurations of the MODULO Collection enable great versatility for all spaces.
