

Duel 1509 racquet female founders in Cambridge, UK

The global launch of the Duel 1509 racquet takes place during the London Design Festival, Shoreditch on 15 09 2026 so everyone can experience how it's mind bending design unlocks the pleasure of fast movement.

The Duel 1509 racquet has turned fast movement into an exquisite pleasure you can indulge in every day.

An ultra-light carbon frame with sound-softening leather shields, gives it a dreamlike level of control, handling and speed-elevating it into the company of architecture, watches and sports cars rather than sports equipment.

Its proportionate, compact and elegantly muscular design defines a timeless, efficient and distinctive shape, imagined to look identical in 2126 as it does today, in 2026.

A racquet almost wearable by nature, presenting an endless temptation to draw it and take part in a Duel – 15 minutes and 09-seconds of fast-moving sport against a single opponent.

Born from minimalism, the Duel 1509 writes into history the memories of the court: the booking agony, the bother of arriving, the burden of the sports bag.

All that remains is you, your opponent, a few square metres of open space, and the euphoria of speed—as you use the racquet to strike the shuttle towards the human being only a few steps in front of you, and they back again.

Soon, the female founded Duel 1509 racquet will be the most popular racquet on Earth.

And you will have experienced the joy it brings for far longer than most, because you will have experienced it first on 15/09 (15 September) 2026 at the official launch at Jolene's Bakery on Redchurch Street, as part of London Design Festival.
